

# LIUBOV POHUDINA

## Full Stack Developer • AI Automation Engineer

JavaScript • TypeScript • React • Redux • Node.js • Express • MongoDB • Swagger • n8n • AI Agents

+48 536 379 221 • drogaltseva92@gmail.com • Starachowice, Poland • GitHub: Profile • LinkedIn: Profile • Telegram

### PROFILE SUMMARY

Full Stack Developer with strong experience in React, Next.js, TypeScript, Node.js, and API documentation using Swagger. I build modern, optimized, production-ready web applications and have hands-on experience in AI automation, including AI agents, n8n workflows, API orchestration, and business process automation.

I'm looking for a company where I can contribute my skills, grow professionally, and collaborate with a strong engineering team.

### WORK EXPERIENCE

#### Front End Developer — NDA

Oct 2024 – May 2026

- Developed high-performance web applications in an arbitration team.
- Focused on optimization, speed, SEO, and Cloudflare integration.
- Improved indexing and accessibility.
- Worked in a fast-paced, high-load environment.

#### Front End Developer — Revelint (Product EVA-I)

Jul 2024 – May 2025 • AI-powered business automation platform

- Developed landing pages, authorization flows, and reusable UI components.
- Improved SEO and accessibility and integrated Google Analytics.
- Stack: React, Redux Toolkit, JWT, styled-components.
- Team: CEO, PM, 2 Frontend, 2 Backend, 2 Designers, 2 QA.

### PROJECT EXPERIENCE

#### Renovation Business Website — Full-Cycle Development

Jun 2026

Live: [spachtel-anstrich-hessen.de](https://spachtel-anstrich-hessen.de)

- Designed and developed the commercial website from scratch with React + Vite.
- Built a responsive UI and implemented GDPR cookie consent.
- Integrated Google Analytics 4 and Web3Forms.
- Configured IONOS domain/DNS and deployed to Cloudflare Pages.
- Handled SEO optimization and legal pages.
- Delivered the full lifecycle: design development analytics hosting compliance.

### CORE SKILLS

Frontend  
React, Next.js, Redux Toolkit, TypeScript, styled-components

Backend  
Node.js, Express, MongoDB

Testing  
Vitest, Testing Library

AI Automation  
n8n, AI Agents, Prompt Design, API Integration

Soft Skills  
Leadership, Teamwork, Responsibility, Time Management

### TECHNOLOGIES

JavaScript / TypeScript

React / Next.js / Redux

Node.js / Express

MongoDB / JWT

Swagger / REST APIs

n8n / AI Agents

Google Analytics / GA4

SEO / Cloudflare

Web3Forms / IONOS DNS

### TOOLS

Git & GitHub

VS Code

SwaggerHub

Cloudflare Pages

Google Analytics

n8n

Web3Forms

IONOS

### LANGUAGES

Ukrainian — Native

English — Intermediate

Polish — Basics

## PROJECT EXPERIENCE — CONTINUED

---

### TaskPro — Full Stack Developer

May 2024 • Task management app • Team of 10

- Worked across frontend and backend in a collaborative full-stack team.
- Frontend: React + Redux.
- Backend: Node.js, MongoDB, Cloudinary.
- Owned Header implementation, user data pop-up, and Swagger API documentation.
- API Docs: [digital-creators-back.onrender.com/api-docs](https://digital-creators-back.onrender.com/api-docs)

## AI AUTOMATION PROJECTS

---

### AI Audio Processing Automation System

Role: AI Automation Engineer

Case: [Notion case study](#)

#### WHAT I BUILT

- Automated audio feedback processing pipeline.
- AI agent for call analysis.
- Automatic transcription and classification.
- Google Sheets integration with polling every 2 minutes.
- Processed / pending status tracking and automated statistics.
- Website integration through webhooks.
- Fully asynchronous architecture designed to avoid timeouts.

#### IMPACT

- 100% automation of call review.
- Response time reduced from minutes to seconds.
- Scalable processing for growing call volumes.
- Eliminated manual listening.
- Unified structured output for business reporting.

### AI Automator — Multi-Agent System

Case: [Notion case study](#)

#### WHAT I BUILT

- Multi-agent architecture.
- Prompt design system.
- API integration layer.
- n8n workflows for orchestration.
- Telegram bot integration.
- Website webhook agent structured response pipeline.
